## PROFESSIONAL SUMMARY

---

Data Analyst with hands-on experience in Microsoft Excel, SQL, Power BI, Power Query, and data modelling, supported by practical business intelligence projects and self-directed learning. Currently expanding my capabilities in Artificial Intelligence and Generative AI, using tools such as ChatGPT and Claude to support data analysis, problem-solving, research, and productivity. I am particularly interested in applying my existing data analytics foundation to AI-focused roles, while continuing to develop my technical skills and understanding of AI technologies. A continuous learner with strong analytical and problem-solving skills, I enjoy working with data to identify patterns, generate insights, and solve practical business problems

## SKILLS

---

**Technical Skills:** SQL | Power BI | Advanced MS Excel | Power Query | Data Cleaning | DAX | Agile | Claude | ChatGPT

## WORK EXPERIENCE

---

**The Citizen** **Feb. 2019 – Current**  
**Layout Design**

- Responsible for daily newspaper layouts within strict publication deadlines while maintaining high levels of accuracy and attention to detail.
- Collaborate with editors, sub-editors, journalists, and photographers to translate editorial requirements into clear, visually engaging page designs.
- Coordinate the review and approval process by incorporating editorial feedback and ensuring all content is publication-ready.
- Participate in daily editorial planning meetings to align page layouts with news priorities and front-page strategy.
- Manage multiple concurrent deadlines, adapting quickly to changing priorities and breaking news in a fast-paced production environment.
- Apply strong attention to detail, problem-solving, and organisational skills to ensure consistency, accuracy, and efficient workflow across daily publications.

**BCX (Training delivered through Capaciti)** **Feb. 2018 – Jan. 2019**  
**Software/Data Intern**

During the first seven months of the internship, I completed intensive classroom-based training at Capaciti, where I built a strong foundation in data analytics, business intelligence, and software engineering before transitioning to practical project work at BCX.

### Capaciti Training Phase

- Completed introductory training in Exploratory Statistical Analysis, developing an understanding of data analysis concepts, data types, distributions, descriptive statistics, and interpreting datasets to support business decision-making.

- Learned the fundamentals of Microsoft Power BI, including data import, transformation with Power Query, data modelling, creating relationships, developing basic DAX measures, and building interactive dashboards.
- Gained practical exposure to the data analytics lifecycle, from collecting and cleaning data to analysing and presenting business insights.
- Developed an understanding of Agile methodologies, collaborative problem-solving, and professional workplace practices through team-based projects and workshops.

#### **BCX Practical Internship**

- Used Microsoft Power BI to clean, transform, model, and visualise business data, converting raw datasets into meaningful interactive dashboards and reports.
- Assisted in developing custom web-based business solutions for BCX clients in the retail industry, contributing to enhancements of client-facing applications.
- Worked with cross-functional teams, including developers, business analysts, and stakeholders, to gather requirements and deliver technical solutions aligned with business objectives.
- Applied analytical thinking and structured problem-solving techniques to identify issues, improve processes, and support data-driven decision-making.
- Participated in Agile ceremonies, including daily stand-ups, sprint planning, and code review sessions, gaining experience working within a collaborative software development environment.
- Strengthened communication skills by presenting findings, discussing technical solutions, and collaborating effectively with both technical and non-technical team members.

#### **Geewiz**

**Feb. 2013 – Sep. 2015**

##### **E-commerce Data & Digital Operations Assistant**

- Managed and maintained product and pricing data for the Geewiz online store by processing supplier Excel workbooks (Rectron), ensuring data accuracy, consistency, and readiness for upload.
- Performed data cleaning, formatting, and validation in Excel to prepare large product datasets for integration into the e-commerce platform.
- Supported data-driven merchandising decisions by ensuring up-to-date pricing, correct product attributes, and accurate stock information on the website.
- Created web-based product advertisements for Bid or Buy auctions, using product data and performance considerations to optimise listings.
- Designed and developed HTML email newsletters, leveraging product data and promotional insights to support digital marketing campaigns.
- Collaborated with marketing and operations teams to ensure alignment between product data, online content, and promotional activities.
- Developed Microsoft Excel reports to analyse key product performance metrics, identifying best- and worst-performing products to support merchandising and pricing decisions.

#### **ONLINE CERTIFICATION**

**Introduction to Digital Technologies(4IR)**

University of Johannesburg

**Oct. 2024 – April 2025**

**Career Boost with Power BI**

Exodus Experts

**Jan. 2025**

## **PERSONAL PROJECTS**

---

### **AI-Assisted-Fraud-Intelligence-Dashboard**

[View on GitHub](#)

Built an executive fraud analytics dashboard in Power BI, using Claude (Power BI Modelling MCP server) as a collaborative AI development partner for DAX design, debugging, and analytical validation.

### **Retail Sales Data Modelling with Power BI**

[Read Medium Article](#)

In this medium article I highlight how I transformed messy operational datasets into a clean analytical data model using Microsoft Power BI and Power Query.

### **End-to-End Data Warehouse, Power BI Reporting & KPI Dashboard**

[View on LinkedIn](#)

In this project I simulated a bicycle and accessories retail business, I designed a structured data warehouse and developed an interactive Power BI analytics dashboard to monitor performance and support data-driven decision-making.
